Master Carton Information

Construction

Master Cartons should be plain cartons and constructed in such a manner as to prevent damage to the products during transit & handling. Adequate cushioning and environmentally friendly material should be used.

Please refer to Drop Test Procedure for individual packed items.

Master Cartons shall be packed with equal quantities. Any partial master cartons must be identified with "partial" marked on it and placed upon a pallet so this mark is clearly visible.

Sizing and Weight Requirements

Dimensions of your master carton must be advised to the Buyer. The Buyer will seek approval from our European Regional Service Centre and once given will advise the Supplier accordingly. Maximum weight per Master Carton is 25kgs.

Shipping Requirements

DDP and FCA

All master cartons should be delivered/collected on 4 way entry block pallets. Please see 'Pallet' section on the 'Shipping' home page.

FOB

All master cartons delivered by containers to Venlo should be on slip sheets. Please see 'Slip Sheet' section on the 'Shipping' home page.
